

## **Overflow Parking Procedure**

The Overflow Parking Lot is the gravel lot at the front of the park by the road, not the parking lot by the pavilion or store. Trailers, boats, cars, etc. must be checked in with the office before being parked in The Overflow Parking Lot. The office will give owners a car pass to put on the unit that is being parked in overflow, which must remain visible at all times. If units are not checked in, they will receive a written warning for the first offense and it will be towed to gated storage for the second offense. When it has to be towed to gated storage, the owner of the unit will be charged the \$20 fee for moving the unit and will have to pay the storage fees of \$1/day for the duration it is stored there.
